

To the FCC. I am a photographer who is constantly on the road, between NYC, NC, and FLA. I am always checking my XM for local traffic and weather for the locations I am traveling to or on the way. Keep it real, help out the traveling folks, by keeping us safe and on the road and out of danger. I cant imagin having to go through both AM and FM miles out of the larger cities I am passing through and trying to find local traffic ANYTIME during the day. If your lucky, you might find it during peek hours (rush hours), and that is hard to do. Xm is doing a great job by offering these services to people like myself and thousands of other motorists that want to stay safe, and arrive with themselves, their families, and cargo in one peice.

Thanks for listening. Hope THIS makes a difference.
